

Skyllz Distributed Platform (SDP) is an open-source, public, blockchain-based and distributed skills validation platform proposed by Workkola, that aims to build an universal and evolving Human Positive Skills Ecosystem that replaces CVs and resumes.

WHAT SKYLLZ SOLVES

The acceleration of technology in every industry and the “commoditization” of degrees due to the hyper competition, have shifted the requirements of the labor market, and a new era of skills allocation, skills contextualization and skills booster has started.

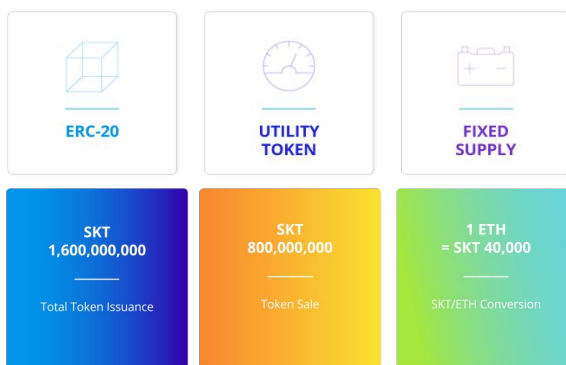

HOW: SKYLLZ DISTRIBUTED PLATFORM (SDP)

Distributed, open-source, skills validation protocol to validate and empower acquisition, allocation, contextualization and boosting of skills in a standardized and meritocratic way freely across current and future Skills Touchpoints Applications (STapps).

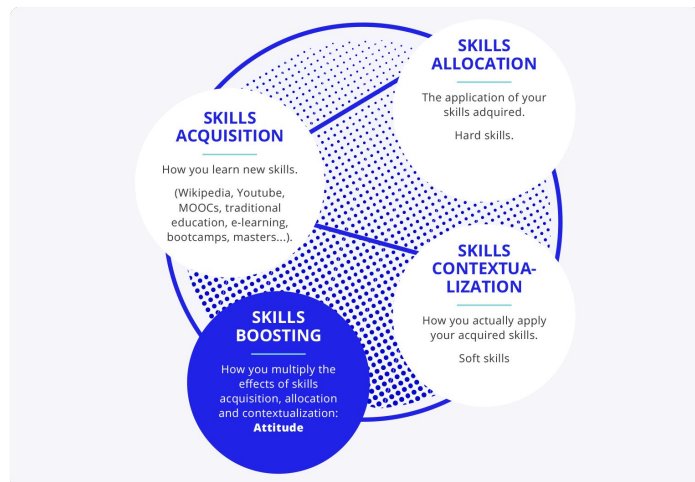

PROOF-OF-SKILL

Proof-of-Skill is the non-tradeable and traceable **reputation** on Skyllz. It handles the validation of the skills that a user possesses directly on the **Ethereum Blockchain**

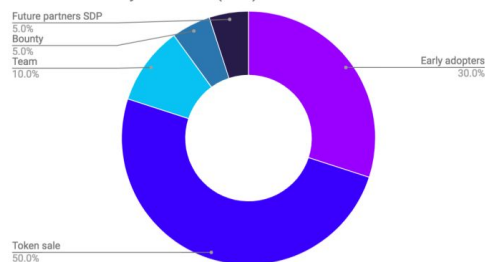

HUMAN SKILLS CYCLE

FUELING SDP: SKYLLZ TOKEN (SKT)

SKTs serve as **units of account** that enable users to access and transact on the SDP to **participate and get validations** of their skills **on or across** any application of the ecosystem

Allocation of Skyllz Tokens (SKT)

ABOUT WORKKOLA. CURRENT PLATFORM

Workkola helps **digitally-skilled students showcase their skills**, build their **Talent Brands** and find amazing **job opportunities** thanks to our **community-driven challenges** marketplace. For **early-stage startups, scale-ups and innovative corporates**, Workkola is the perfect tool to **assess and attract vetted talent** to work with.
