# Skyllz.
by workkola

Skyllz Distributed Platform (SDP) is an open source, blockchain-based and cross-platform skills-validation protocol proposed by Workkola. It aims to build a universal and evolving Human Skills Ecosystem that replaces CVs.

WHAT SKYLLZ SOLVES

The acceleration of technology in every industry and the "commoditization" of degrees due to the hyper competition, have shifted the requirements of the labor market. A new era of skills allocation, skills contextualization and skills booster has started.
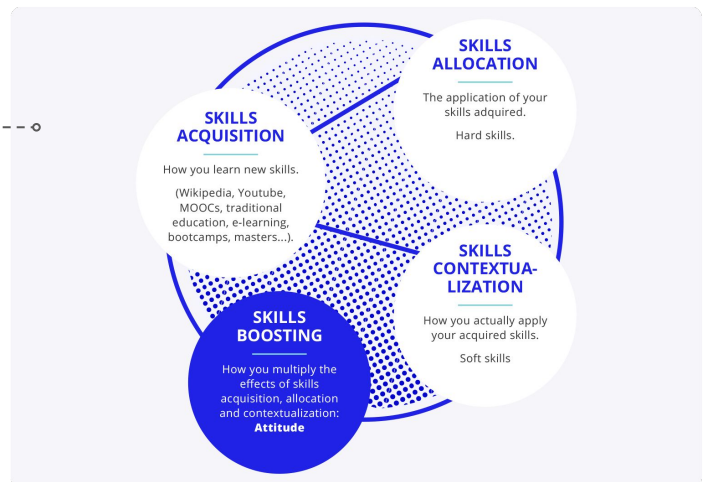

HOW: SKYLLZ DISTRIBUTED PLATFORM (SDP)

Distributed and open-source protocol to validate and empower skills in a standardized and meritocratic way freely across Skills Touchpoints Applications (STapps).

HUMAN SKILLS CYCLE

SKILLS ALLOCATION
The application of your skills adquired.
Hard skills.

SKILLS ACQUISITION
How you learn new skills.
(Wikipedia, Youtube, MOOCs, traditional education, e-learning, bootcamps, masters...).

SKILLS CONTEXTUA-LIZATION
How you actually apply your acquired skills.
Soft skills

SKILLS BOOSTING
How you multiply the effects of skills acquisition, allocation and contextualization:
